

### For Earth, For Life

### KUBOTA DIESEL TRACTOR Made in Japan Premium Narrow Tractor

M-Series Narrow tractors ergonomically designed to provide optimal performance and comfort.

### HIGH PERFORMANCE

### Narrow enough to work between the vines and low enough to get you under the limbs.

### Center-direct Injection Engine (E-CDIS)

The M7040 and M8540 narrow tractors are equipped with Kubota's revolutionary center-direct injection system engines. The E-CDIS engine offers a rare combination of more power, optimum durability and greater efficiency. It provides you with what you need to get the job done quicker, while still minding your budget.

### Low Noise and Low Vibration

To help reduce operator fatigue and stress, the V3307 and V3800 engines have been specially designed to minimize noise and vibration. This is accomplished through several innovative technologies. Noise is reduced through a ladder frame crankshaft support, giving the engines a stiffer structure and thus lower noise.

### F8/R8 Transmission (M7040)

The synchronized four speeds of the main shift and a high/low range supply tractors with 8 Forward and 8 Reverse speeds. An optional cassette creep speed makes 12F/12R.

### F10/R10 Transmission (M8540)

For heavy-duty work such as spraying, plowing and heavy trailer applications M8540 model can be equipped with an F10/R10 transmission.An optional cassette creep speed makes 15F/15R.

### **Automatic 4-wheel Braking**

The 4-wheel drive works together with our mechanical wet disc brake system to offer safe stops. When traveling in 2WD, and both brakes are applied, 4WD instantly engages for 4 wheel braking power.

### Bevel Gear Front-Wheel Drive with Bi-Speed Turn

Kubota's exclusive Bi-Speed Turn feature rotates the front wheels at a rate of speed nearly twice that of the rear wheels whenever the front wheels exceed a turning angle of about 30 degrees. The result is a smoother, tighter turn, allowing you to turn into an adjacent crop row on your first attempt. This feature also helps to significantly reduce surface damage. For safety, the Bi-Speed turn feature is automatically cancelled when traveling at higher speeds.

# HIGH QUALITY

Long-lasting strength, durability and reliability to tackle just about anything with ease.

Rear work

liaht

### **Multiple Wet Disc Clutch**

The multiple wet disc clutch provides durability and a long operating life. When attaching implements, our improved inching feature is easy to perform, giving you the same feel as a traditional mechanical clutch.

### Hydraulic Independent PTO Clutch

The Live-Independent, 540rpm PTO with wettype clutch expands the use of the M-Series to include rear-mounted, PTO-driven implements such as sprayers, rotary tillers, rear-mount mowers and post-hole diggers.

### 540/540E PTO (Standard)

When using the 540/540E PTO, the maximum engine speed is to ensure low fuel consumption and prevent operation errors and damage to implements caused by high rotations.

### Remote Hydraulic Control Valves

The M40 Narrow Series offers two standard Remote Hydraulic Control Valves for a greater selection of hydraulically powered implements. For operators, this versatile system translates into a convenient and cost-efficient solution.

## **OPERATOR'S COMFORT**

### Outstanding comfort and productivity come hand-in-hand to tackle jobs with ease.

### **Hydraulic Shuttle Shift**

The steering column-mounted hydraulic shuttle shift makes forward and reverse maneuvers smooth and quick. Clutch-less operation helps boost productivity, especially when operating in narrow orchard's where the frequent forward

and reverse movements are necessary. An improved inching feature gives the same feel as a half-clutch operation for easier attachments of implements.

### **LED Readout**

An LED readout makes viewing vital functions of your M-Series tractor clear and easy. View travel speed, PTO revolution and hour meter information digitally. LED illumination type analog indicators include a large tachometer, temperature gauge and fuel gauge. A battery warning light, and a 4WD/Bi-speed indicator have also been added to the M-Series.

### Hand Accelerator

The hand accelerator is located on the right side of the steering column for easy access for the operator.

### **User-friendly levers**

All of the operation levers are within easy reach, so the operator doesn't need to shift their body position or stretch awkwardly to operate the levers. The levers are designed to be moved with little effort, the operator can work longer with less fatigue and in greater comfort.

### NARROW CAB

### Tend the vines and work the orchards in comfort. Kubota keeps you covered and cool.

### **Innovative Kubota Narrow Cab**

The narrow cab model features an air-conditioned cab that keeps the operator comfortable while on the job. It provides ample head clearance for maximum visibility, and offers protection from the elements, branches and insects.

### **Air Conditioner/Heater**

Whether you're trying to beat the heat on a hot summer day, or stay cozy during the chill of winter, the deluxe air conditioner / heater puts you in charge of the climate. This advanced system maximizes airflow and optimizes cooling, heating, and air ventilation to help you work comfortably year-round and in any temperature.

### Full-Flat Deck (Cab model)

Legroom can make a big difference in operating comfort. That's why the M-Series cab model has a deck that is completely flat from front to back to ensure maximum legroom and optimum comfort. The fully flat deck also makes getting in and out of the cab much easier.

### **Standard Equipment**

- Front windshield wiper and washer.
- Two front and two rear halogen work lights.
- Interior dome light.
- Side mirror (right).
  Power socket for ci
- Power socket for cigarette lighter.
- 3-pin, 12 Volt, 30 Amp coupler.
- 7-pin trailer coupler.
- Horn.

## **KUBOTA PARTS**

KUBOTA

It makes sense to keep your Kubota running like new with GENUINE KUBOTA PARTS. Kubota parts are designed and engineered to original factory specification to keep your equipment operating at peak performance. And with our industry-leading parts availability, you can have confidence that our local Kubota dealer will be able to quickly supply the parts you need.

The company reserves the right to change the above specifications without notice. This brochure is for descriptive purpose only. For your safety, KUBOTA strongly recommends the use of a Rollover Protective Structure (ROPS) and seat belt in almost all applications. The operator's manual should be consulted for more complete operational information.
